

Prerequisite for Apigee DevJam

You will have to set up a free trial instance of Apigee Edge that you can use to build our labs on the day of Devjam.

If you already have a trial account with Apigee, you can skip this step and use your existing instance. You are all set. Access your Apigee instance by signing in here: <https://login.apigee.com/login>.

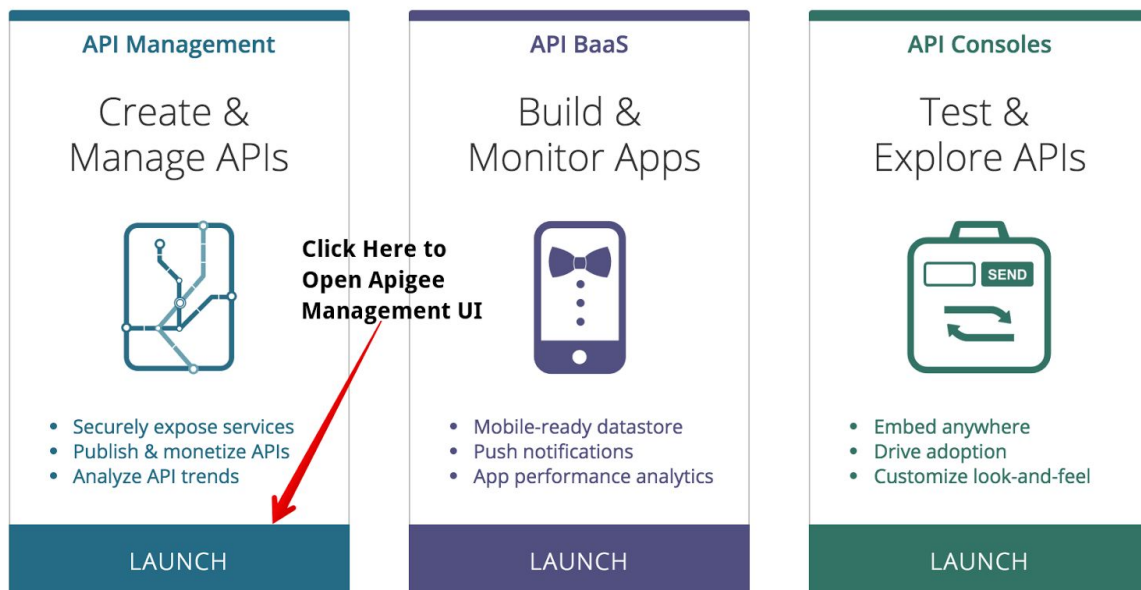

Sign-up for Apigee Edge trial account

If you're new to Apigee, visit this page to create an account:

https://accounts2.apigee.com/accounts/sign_up

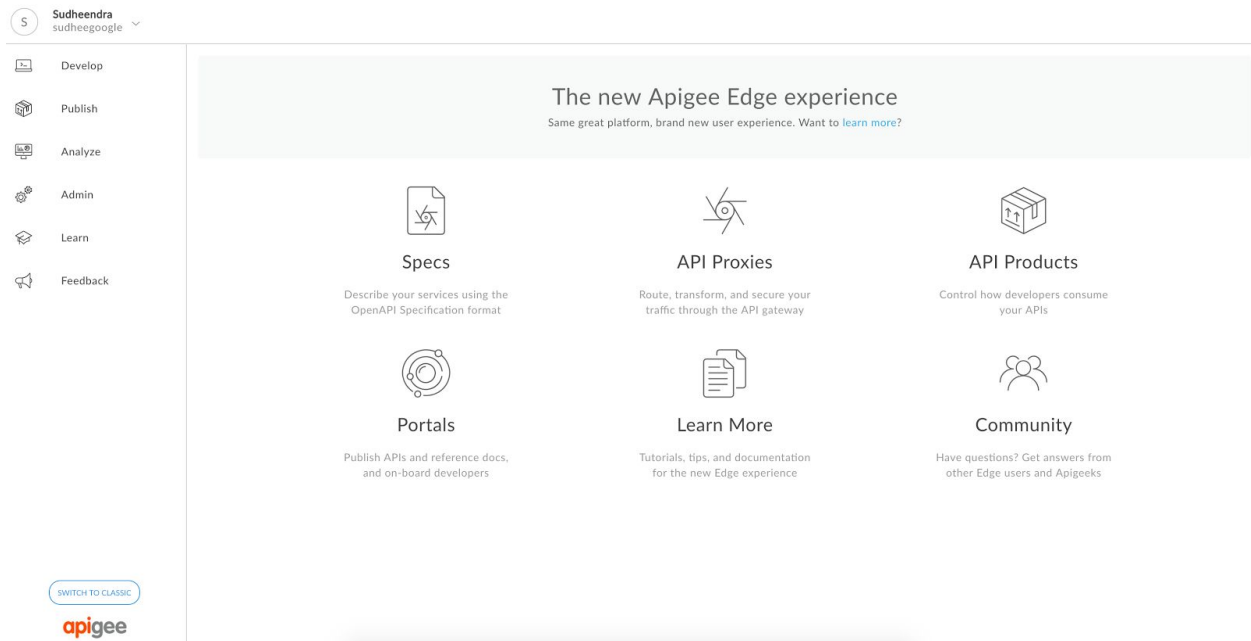

This will send out an email with an activation link. Click on the link to activate your account.

After signing into your new account you will see the Apigee launch page:

Select the **Launch** button under the **Create and Manage APIs** to access the Apigee Edge Management UI. This will take you back to the login screen. Enter your credentials and

this *SHOULD* take you to the Dashboard of the Apigee Edge Management UI which looks like this:

Once you have successfully created an account and accessed the Apigee Edge Management UI, you are all set!
